

The ultra-compact HM-4 offers a simple yet effective way to split a single stereo signal out to four pairs of headphones. The two rackmount models, the HM-400 and HM-800, deliver flexible, robust headphone distribution for studios, practice spaces and more.

HM-4

HM-400

HM-800

FEATURES

BUILT-LIKE-A-TANK™

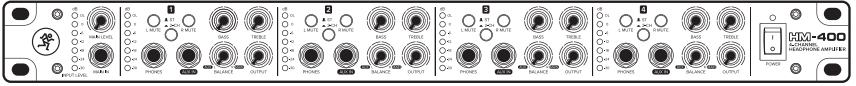

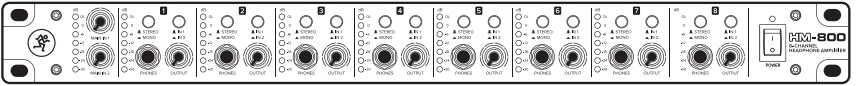

With a heavy-gauge steel chassis, long wear potentiometers and switches, the HM Series is built to last.

EXCELLENT SOUND QUALITY

Premium analog circuitry and design delivers an ultra-low noise floor and high headroom.

ULTRA-FLEXIBLE

Whether you need simple headphone splitting or robust cue mix distribution, the affordable HM Series offers the sound quality, reliability, and flexibility you need to expand your setup.

HM-400 4-Channel Headphone Amplifier

The 19" rackmount HM-400 4-Channel Headphone Amplifier offers an incredible amount of versatility and excellent sound quality in a single rack space. Perfect for professional applications including studios, Houses of Worship, practice spaces, and more. The HM-400 features a main input with level control plus stereo outs, aux inputs and EQ per channel with 12 total headphone outputs.

FEATURES

- L/R Main stereo inputs plus L/R stereo outputs
- 7 segment LED metering per channel plus main
- 3 headphone outputs per channel
- Aux input on each channel with balance control to mix main and aux signal
- Mute and stereo/2-ch mode switches per channel
- 12 total headphone outputs
- Built-Like-A-Tank™ construction

HM-800 8-Channel Headphone Amplifier

The 19" rackmount HM-800 8-Channel Headphone Amplifier offers up to 10 available mixes with a total of 16 headphone outputs. Perfect for professional applications including studios, Houses of Worship, practice spaces, and more. Featuring 2 discrete main inputs with level control plus stereo outs, aux inputs per channel.

FEATURES

- 2 discrete main stereo inputs with separate level control plus stereo outputs
- 7 segment LED metering per channel plus main
- 2 headphone outputs per channel
- 8 independent aux inputs for up to 8 individual stereo mixes
- Input Select and Stereo/Mono switches per channel
- 16 total headphone outputs
- Built-Like-A-Tank™ construction

HM-4 4-Way Headphone Amplifier

The ultra-compact HM-4 4-Way Headphone Amplifier features a 1/4" stereo input and four 1/4" headphone outputs with individual level controls. Perfect for studios or even at home when up to four people want to listen together.

FEATURES

- Share a single stereo source with up to 4 pairs of headphones
- Individual level control for each output
- Powered via the included 12v AC adapter
- Built-Like-A-Tank™ construction
